

CONNECTIVITY, PLANT AND SUBSCRIBER RECORDS

A routing fault can disconnect clients.

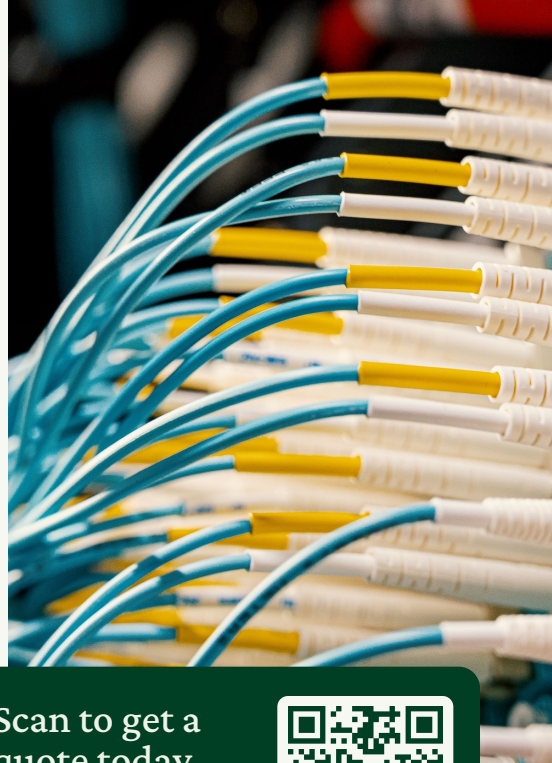

You provide connectivity through your plant and upstream providers. Accepted service duties and actual retained records matter; hardware repair, cyber response and service-credit demands are distinct.

RISKS WORTH DISCUSSING

- 01 Routing or connectivity-provisioning errors
- 02 Exposure of retained subscriber records
- 03 Internal failures of owned network equipment

Coverage worth discussing

Cyber liability

Covered subscriber–data response and privacy claims.

Commercial property

Insured accepted network plant after covered damage.

Professional liability

Covered claims from accepted connectivity services.

Equipment breakdown

Covered internal failures of accepted network systems.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
