The Southern Agency
Insurance & Bonds

FOUNDRY CASTING OPERATIONS

Molten iron and silica put foundry crews at risk.

Your foundry uses molten iron and silica-bearing sand. These processes create severe burn and respiratory hazards.

RISKS WORTH DISCUSSING

01 **Molten iron burns and explosions**

02 **Respirable crystalline silica dust**

03 **Furnace and pouring equipment failure**

IRON FOUNDRY INSURANCE

Coverage worth discussing

Commercial property
Furnaces and specifically insured customer patterns.

Equipment breakdown
Covers internal failure of heavy casting furnaces.

Products liability
Covered harm to others from supplied iron castings.

Workers compensation
Provides medical benefits for foundry work injuries.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 **Listen**
We review your operations, coverage and past claims.

02 **Assess**
We look at hazards and ways to reduce risk.

03 **Build**
We compare carriers, premiums and audit terms.

04 **Support**
We revisit coverage as your work changes.
