The Southern Agency
Insurance & Bonds

ORE HANDLING, CRUSHERS AND LOADOUT

Crusher failures can stop loadout.

You extract iron ore and move it through crushing, handling and loading systems. Actual stationary and mobile equipment need separate terms, with machinery repairs distinguished from production or output guarantees.

RISKS WORTH DISCUSSING

01 **Internal crusher or conveyor failures**

02 **Physical damage at loadout facilities**

03 **Third-party injury around ore handling**

IRON ORE EXTRACTION SITE INSURANCE

Coverage worth discussing

Equipment breakdown
Covered internal failures of accepted ore-handling machinery.

Commercial property
Insured loadout facilities after covered physical damage.

Inland marine
Insured mobile units under accepted mine-equipment terms.

General liability
Covered third-party injury from accepted site operations.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 **Listen**
We review your operations, coverage and past claims.

02 **Assess**
We look at hazards and ways to reduce risk.

03 **Build**
We compare carriers, premiums and audit terms.

04 **Support**
We revisit coverage as your work changes.
