

HIGH-VOLUME VEGETABLE PROCESSING FACILITY

A process fault can affect juice lots.

You press, treat and fill produce-based juices, often around harvest windows. Contamination, process-control faults and perishable inputs create different product, machinery and stock interests.

RISKS WORTH DISCUSSING

- 01 Produce contamination and recall
- 02 Process control and pasteurization failures
- 03 Seasonal raw produce spoilage

Coverage worth discussing

Products liability

Covered resulting harm from supplied juice products.

Commercial property

Insured juice-processing assets after covered damage.

Equipment breakdown

Covered internal failures of accepted processing machinery.

Environmental liability

Covered cleanup under accepted plant-wastewater terms.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
