

FLOOD-PROTECTION CONSTRUCTION

High water can expose weak compaction.

You build flood-protection embankments using heavy earthmoving near populated zones. Compaction errors can harm property downstream.

RISKS WORTH DISCUSSING

- 01 Embankment failure or seepage
- 02 Heavy equipment incidents
- 03 Environmental sediment runoff

Coverage worth discussing

General liability

Covers third-party injury or damage from earthmoving work.

Inland marine

Covers dozers and scrapers against theft or damage.

Workers compensation

Provides medical and wage benefits for staff injuries.

Builders risk

Project-property terms for unfinished embankments.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
