

QUARRY FACES, CRUSHING AND STONE LOADS

Flyrock can damage nearby property.

You extract limestone, crush material and send graded stone to customers. Actual blasting, mobile equipment and product uses need accepted terms, with ground movement and rejected loads distinguished from covered third-party harm.

RISKS WORTH DISCUSSING

- 01 Flyrock or blast-vibration damage
- 02 Internal crushing-equipment failures
- 03 Resulting harm from supplied stone

Coverage worth discussing

General liability

Liability under expressly accepted quarry and blasting terms.

Equipment breakdown

Covered internal failures of accepted crushing machinery.

Inland marine

Insured mobile plant under accepted quarry-equipment terms.

Products liability

Covered resulting harm from accepted stone products.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
