

LIQUID PIPELINE ROUTES AND STATIONS

A line rupture can release its contents.

You transport liquids through pipelines between facilities. A rupture or system error could lead to significant cleanup and contamination liabilities.

RISKS WORTH DISCUSSING

- 01 Release along long transport routes
- 02 Shipper product damage and custody
- 03 Pressure control and station failure

Coverage worth discussing

Environmental liability

Covered cleanup under accepted route and release terms.

Cyber liability

Covered response to defined control-network incidents.

Commercial property

Insured stations and expressly accepted pipeline assets.

Equipment breakdown

Covered internal failures of accepted pumping equipment.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
