The Southern Agency
Insurance & Bonds

GRAIN MALTING AND KILNING FACILITY

# Kiln heat can ignite grain dust.

You steep, germinate and kiln grain into malt. Dust ignition, hot kilns and moisture-related stock conditions involve different plant, machinery and product interests.

RISKS WORTH DISCUSSING

01 **Combustible grain dust explosions**

02 **High temperature kiln fires**

03 **Grain spoilage and mold growth**

MALT PRODUCTION FACILITY INSURANCE

# Coverage worth discussing

**Commercial property**
Insured kilns and declared grain after covered damage.

**Equipment breakdown**
Covered internal failures of accepted conveyors or kiln drives.

**Products liability**
Covered resulting harm from supplied malt products.

**Workers compensation**
Work-injury benefits for eligible malting employees.

Coverage is subject to policy terms and exclusions.

## Why The Southern Agency

01 **Listen**
We review your operations, coverage and past claims.

02 **Assess**
We look at hazards and ways to reduce risk.

03 **Build**
We compare carriers, premiums and audit terms.

04 **Support**
We revisit coverage as your work changes.
