

SPECIMEN TESTING AND DIAGNOSTIC RESULTS

A wrong result can change care.

You process specimens and release diagnostic results. Testing errors, physical sample loss and lost information involve different duties, values and accepted terms across laboratory and courier handoffs.

RISKS WORTH DISCUSSING

- 01 Incorrect diagnostic results
- 02 Specimen contamination in transit
- 03 Critical analyzer mechanical failures

Coverage worth discussing

Professional liability

Specialist liability for accepted diagnostic testing and reporting.

Inland marine

Declared physical specimen loss during accepted courier stages.

Equipment breakdown

Covered internal failures of accepted analyzers.

Cyber liability

Covered patient-data breach response and privacy claims.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
