

DEFENSE COMPONENTS AND TECHNICAL DATA

A failed component can injure a user.

You design, manufacture or service components for defense customers. End uses, government property and actual design roles need express acceptance, with export or security compliance separate from insured incident response.

RISKS WORTH DISCUSSING

- 01 Resulting harm from defense components
- 02 Alleged engineering or integration errors
- 03 Accepted technical-data security incidents

Coverage worth discussing

Products liability

Covered resulting harm from expressly accepted defense outputs.

Commercial property

Insured plant and declared entrusted property after covered damage.

Workers compensation

Work-injury benefits for eligible manufacturing employees.

Professional liability

Covered claims involving accepted engineering or integration duties.

Cyber liability

Covered response involving expressly accepted technical data.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
