

CYCLE AND ASSEMBLY OPERATIONS

Assembly errors affecting rider safety

You assemble bicycles, motorcycles, or powered cycles. Brake errors or battery issues create hazards for road riders.

RISKS WORTH DISCUSSING

- 01 Drivetrain and brake assembly errors
- 02 Lithium battery thermal runaway events
- 03 Test ride and demo site accidents

Coverage worth discussing

Products liability

Covers injury claims caused by bike assembly errors.

Commercial property

Protects assembly tools and finished cycle inventory.

Commercial auto

Eligible road-test liability for declared powered cycles.

General liability

Assists with injury claims from plant site visitors.

Workers compensation

Provides support for employees injured during testing.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
