

NANOSCALE MATERIALS AND LAB INSTRUMENTS

A lab failure can halt research.

You develop nanoscale materials using sensitive lab instruments. Actual materials, research and commercial outputs need express acceptance, with experimental value separate from equipment repair.

RISKS WORTH DISCUSSING

- 01 Internal cleanroom-equipment failures
- 02 Releases involving accepted nanomaterials
- 03 Allegedly flawed research reports

Coverage worth discussing

Commercial property

Insured cleanrooms and instruments after covered physical damage.

Environmental liability

Cleanup under expressly accepted nanomaterial-release terms.

Products liability

Covered resulting harm from expressly accepted material outputs.

Equipment breakdown

Covered internal failures of accepted laboratory instruments.

Professional liability

Covered claims alleging accepted research-service errors.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
