

HIGH-PRESSURE GAS TRANSMISSION

A ruptured line can interrupt gas flow.

Pipeline operators manage high-pressure systems and compressor stations. Mechanical failures or system ruptures create significant property, liability, and delivery interruption concerns.

RISKS WORTH DISCUSSING

- 01 Pressurized gas release events
- 02 Right-of-way development proximity
- 03 Compressor and pressure system failures

Coverage worth discussing

General liability

Covered third-party harm from accepted transmission duties.

Equipment breakdown

Covered internal failures of accepted compressor equipment.

Cyber liability

Covered response to defined control-network incidents.

Commercial property

Insured stations and expressly accepted pipeline assets.

Environmental liability

Covered pollution response involving accepted gas releases.

Umbrella liability

Extra limits above expressly covered underlying liabilities.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
