

NAVIGATION HARDWARE AND SOFTWARE

Positioning and mapping error claims

You build navigation units. Review positioning errors, declared aviation or marine uses and the location data you hold.

RISKS WORTH DISCUSSING

- 01 Positioning and faulty map output
- 02 Hardware failure in critical usage
- 03 Cyber breach of sensitive location data

Coverage worth discussing

Products liability

Covered harm from accepted navigation-device uses.

Cyber liability

Response to covered breaches of held location data.

Inland marine

Covers navigation units during shipping to dealers.

Professional liability

Eligible claims from accepted mapping or firmware work.

Commercial property

Covers RF test equipment and finished device stock.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
