

ELECTRIC UTILITY GENERATION

Conventional machinery failures can stop generation.

You operate fission generation facilities. Nuclear, radiation and reactor interests require specialist arrangements; conventional assets and employee duties also need explicit nuclear-site acceptance.

RISKS WORTH DISCUSSING

- 01 Conventional turbine mechanical failure
- 02 Radiation exposure for site staff
- 03 Security and access control allegations

Coverage worth discussing

Commercial property

Conventional assets under accepted specialist nuclear terms.

General liability

Conventional site claims under expressly accepted nuclear-facility terms.

Equipment breakdown

Covered internal failures under accepted nuclear-site terms.

Workers compensation

Employee injury arrangements matched to employer, duties and law.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
