

## PIPELINE INSTALLATION

# A live tie-in brings spill and fire risks.

You install pipeline systems over terrain. Trenching and welding near live systems create spill and pressure explosion potential.

## RISKS WORTH DISCUSSING

- 01 Pollution releases and spills
- 02 Fire and explosion during tie-ins
- 03 Strikes on active utility lines

# Coverage worth discussing

## General liability

Addresses injury or property damage from work.

## Environmental liability

Addresses cleanup or pollution claims.

## Workers compensation

Provides benefits for trenching hazards.

## Inland marine

Addresses loss to excavators and bore rigs.

Coverage is subject to policy terms and exclusions.

## Why The Southern Agency

### 01 Listen

We review your operations, coverage and past claims.

### 02 Assess

We look at hazards and ways to reduce risk.

### 03 Build

We compare carriers, premiums and audit terms.

### 04 Support

We revisit coverage as your work changes.
