The Southern Agency
Insurance & Bonds

PIPELINE FLOW MAINTENANCE

A failed seal can release pressurized oil.

You maintain motors and pumps that keep oil moving. Seal leaks, switchgear faults and connected-pipeline duties create different repair and liability questions.

RISKS WORTH DISCUSSING

01 **Rotating motor mechanical failure**

02 **Pressurized liquid seal escape**

03 **Switchgear electrical fault damage**

OIL PUMPING STATION INSURANCE

Coverage worth discussing

Commercial property
Insured station buildings and declared electrical assets.

Environmental liability
Covered cleanup from accepted station-fluid releases.

Equipment breakdown
Covered internal failures of accepted pumps or motors.

General liability
Covered visitor or neighbor claims from accepted duties.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 **Listen**
We review your operations, coverage and past claims.

02 **Assess**
We look at hazards and ways to reduce risk.

03 **Build**
We compare carriers, premiums and audit terms.

04 **Support**
We revisit coverage as your work changes.
