The Southern Agency
Insurance & Bonds

PETROLEUM PROCESSING OPERATION

An explosion can affect several processing units.

Your refinery converts crude through connected processing units. Shared utilities, maintenance turnarounds and finished-product quality can spread the effects of one incident.

RISKS WORTH DISCUSSING

01 **Flammable process unit explosion**

02 **Shared utility compressor failure**

03 **Downstream fuel quality damage**

OIL REFINERY INSURANCE

Coverage worth discussing

Commercial property
Insured process units after covered physical damage.

Environmental liability
Covered cleanup from accepted process-liquid releases.

Equipment breakdown
Covered internal failures of accepted heaters or turbines.

Products liability
Covered resulting harm from supplied finished products.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 **Listen**
We review your operations, coverage and past claims.

02 **Assess**
We look at hazards and ways to reduce risk.

03 **Build**
We compare carriers, premiums and audit terms.

04 **Support**
We revisit coverage as your work changes.
