

ORBITAL PLATFORM MANAGEMENT

Lost research data can raise customer claims.

You support orbital experiments from ground labs and mission control. Research-service errors, station assets and crew interests need different accepted terms.

RISKS WORTH DISCUSSING

- 01 Mission control data breach
- 02 Payload integration professional errors
- 03 Ground facility property interruption

Coverage worth discussing

Professional liability

Eligible integration or data-delivery service-error claims.

Commercial property

Insured ground laboratories after covered physical damage.

Workers compensation

Employee injury benefits for included ground roles.

Cyber liability

Covered mission-data restoration and privacy-response costs.

Directors and officers

Covered management claims involving investor disclosures.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
