

HEAVY LOADS BETWEEN MINES AND MILLS

An overturned load can block a road.

You haul dense ore between mines, mills and terminals. Road vehicles, off-road haulers and cargo need distinct terms, with spillage cleanup considered separately from cargo damage.

RISKS WORTH DISCUSSING

- 01 Road collisions with loaded trucks
- 02 Physical damage to insured ore cargo
- 03 Driver injuries during hauling work

Coverage worth discussing

Commercial auto

Covered road liability for accepted ore-hauling vehicles.

General liability

Covered third-party injury from accepted yard operations.

Motor truck cargo

Covered physical damage to expressly insured ore cargo.

Workers compensation

Work-injury benefits for eligible hauling employees.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
