PUMPING MACHINERY AND CONTROLS

One failed motor can stop a segment.

You operate pumping stations that keep liquids flowing. If a key motor fails, the entire connected segment may be forced to stop.

RISKS WORTH DISCUSSING

01 **Mechanical pump or drive failure**

02 **Electrical control system fault**

03 **Piping seal and liquid release**

PIPELINE PUMPING STATION INSURANCE

Coverage worth discussing

Equipment breakdown
Covered internal failures of accepted pumps or drives.

Environmental liability
Covered cleanup from accepted station-liquid releases.

Workers compensation
Work-injury benefits for eligible station employees.

Commercial property
Insured station controls after covered physical damage.

General liability
Covered visitor or neighbor claims from accepted duties.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 **Listen**
We review your operations, coverage and past claims.

02 **Assess**
We look at hazards and ways to reduce risk.

03 **Build**
We compare carriers, premiums and audit terms.

04 **Support**
We revisit coverage as your work changes.
