

MODULAR AND METAL ERECTION

Erecting Structures at Height

You unload, stage, and assemble modular units. Connection failures or dropped sections during lifts threaten crews and site progress.

RISKS WORTH DISCUSSING

- 01 Falls during elevated assembly
- 02 Crane and lift handling events
- 03 Structural connection failures

Coverage worth discussing

General liability

Pays for third-party injury or site damage.

Builders risk

Covers the structure against fire or wind.

Inland marine

Protects tools and components during staging.

Umbrella liability

Extra limits above covered underlying liabilities.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
