

## PULPING AND RECOVERY OPERATIONS

# Recovery boiler pressure failure risk

Your mill converts wood fiber into pulp. Chemicals, heavy machinery and pressure vessels create significant hazards.

## RISKS WORTH DISCUSSING

- 01 Recovery boiler and pressure-vessel failure
- 02 Chemical handling and recovery hazards
- 03 Combustible dust and black liquor fires

# Coverage worth discussing

## **Commercial property**

Covers process assets and finished pulp inventory.

## **Equipment breakdown**

Helps with internal failure of recovery boilers.

## **Environmental liability**

Helps with covered pollution cleanup claims.

## **General liability**

Covers third-party injury from mill operations.

Coverage is subject to policy terms and exclusions.

## Why The Southern Agency

### **01 Listen**

We review your operations, coverage and past claims.

### **02 Assess**

We look at hazards and ways to reduce risk.

### **03 Build**

We compare carriers, premiums and audit terms.

### **04 Support**

We revisit coverage as your work changes.
