

FINISHED-FUEL TRANSPORT OPERATION

A batch error can affect downstream users.

You transport finished fuels and manage batch interfaces. Product custody, off-spec delivery and route releases need terms matching the actual fuel and duties.

RISKS WORTH DISCUSSING

- 01 Fuel released along route
- 02 Batch interface mishandled
- 03 Sensitive downstream use

Coverage worth discussing

Environmental liability

Covered cleanup from accepted finished-fuel releases.

General liability

Covered third-party harm from accepted pipeline duties.

Commercial property

Insured stations and expressly accepted batching assets.

Umbrella liability

Extra limits above expressly covered underlying liabilities.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
