

REEFER UNITS AND TEMPERATURE-SENSITIVE LOADS

A cooling fault can ruin a load.

You haul temperature-sensitive goods in reefers. Compare breakdown, setpoint and fuel conditions; accepted cargo damage, mobile-unit repair and a receiver's rejected-load demand are different interests.

RISKS WORTH DISCUSSING

- 01 Cargo damaged by temperature changes
- 02 Contamination of accepted food loads
- 03 Employee injuries during reefer checks

Coverage worth discussing

Motor truck cargo

Accepted temperature-variation damage to cargo.

Commercial auto

Covered road liability for accepted reefer fleets.

Equipment breakdown

Internal failures of expressly accepted mobile units.

Workers compensation

Benefits for qualifying driver/service work injuries.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
