

GROUND UPLINKS AND CONTENT DISTRIBUTION

Uplink failures interrupt feeds.

You route programming through ground facilities and satellite distribution services. Ground equipment, cyber events and accepted content duties need separate terms from spacecraft interests or ordinary service-outage obligations.

RISKS WORTH DISCUSSING

- 01 Physical damage at ground uplinks
- 02 Internal transmission-system failures
- 03 Content-distribution or rights claims

Coverage worth discussing

Commercial property

Insured ground uplink facilities after covered damage.

Cyber liability

Covered network-data breach response and privacy claims.

Equipment breakdown

Covered internal failures of accepted ground systems.

Professional liability

Accepted professional terms for distribution or media claims.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
