

GROUND STATIONS AND MANAGED LINKS

An amplifier fault can break a link.

You manage terrestrial satellite links and ground infrastructure. Accepted link duties, antennas and amplifiers need distinct terms; orbital assets, interference and customer service credits require separate review.

RISKS WORTH DISCUSSING

- 01 Link-management configuration errors
- 02 Internal failures of ground amplifiers
- 03 Security incidents involving actual network access

Coverage worth discussing

Professional liability

Covered claims from accepted ground-link services.

Cyber liability

Covered incidents under accepted data/network terms.

Commercial property

Insured terrestrial antennas/facilities after covered loss.

Equipment breakdown

Covered internal failures of accepted amplifiers/modems.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
