

PRECISION SPACECRAFT ASSEMBLY

A cleanroom failure can damage satellite hardware.

You assemble and test satellite hardware in cleanrooms. Plant assets, customer hardware, completed products and launch or orbital stages need distinct accepted terms.

RISKS WORTH DISCUSSING

- 01 Cleanroom environmental control failure
- 02 Latent spacecraft hardware defects
- 03 Technician floor and machinery injuries

Coverage worth discussing

Products liability

Covered third-party harm under accepted hardware terms.

Equipment breakdown

Covered internal failures of accepted test chambers.

Cyber liability

Covered investigation or restoration involving mission data.

Commercial property

Insured cleanrooms and declared tooling after covered damage.

Inland marine

Declared components on expressly accepted transit legs.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
