

LUMBER PROCESSING

Fire and dust explosion risks

Sawmills process logs into lumber through complex machinery. You need insurance accounting for production interruptions, equipment breakdown, and inventory losses.

RISKS WORTH DISCUSSING

- 01 Fire and dust explosion
- 02 Milling machinery breakdown
- 03 Worker amputation and entanglement

Coverage worth discussing

Commercial property

Covers fire damage to kilns and inventory.

Equipment breakdown

Covered internal failures of saws or kiln machinery.

General liability

Defends third-party injury or damage claims.

Products liability

Covered harm to others from supplied lumber.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
