

PUMPING, EXCAVATION AND SEWAGE HAULING

A pumping spill can contaminate land.

You may install, inspect or pump septic systems and haul sewage. Declare actual excavation, tank-entry and disposal duties; resulting property claims, accepted releases and portable gear need distinct terms.

RISKS WORTH DISCUSSING

- 01 Sewage releases during pumping or transit
- 02 Damage around customer excavations
- 03 Work injuries involving tanks or gases

Coverage worth discussing

General liability

Claims under accepted septic-service operations.

Environmental liability

Cleanup under accepted sewage-release terms.

Inland marine

Insured portable cameras, pumps and service tools.

Commercial auto

Road liability for accepted vacuum-truck use.

Workers compensation

Benefits for qualifying septic-service injuries.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
