

SEPTIC AND WASTEWATER WORK

Containment risks in every dig

You combine excavation with tank setting. A failed drain field can release effluent, causing contamination and cleanup costs.

RISKS WORTH DISCUSSING

- 01 Effluent release and contamination
- 02 Trench and excavation collapse
- 03 Underground utility strikes

Coverage worth discussing

General liability

May respond to site injury or property damage.

Environmental liability

May address cleanup costs for effluent release.

Workers compensation

May provide benefits for trenching crews.

Commercial auto

Vehicle liability while hauling tanks and equipment.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
