

PIPELINE AND TRENCHING

Underground risks during live ties

You install mains beside existing utilities. Consider live tie-ins, trench conditions, public property and pumps at the site.

RISKS WORTH DISCUSSING

- 01 Trench cave-in and collapse
- 02 Striking buried utilities
- 03 Sewage release and contamination

Coverage worth discussing

General liability

May respond to third-party injury or damage.

Workers compensation

May provide benefits for trench accidents.

Environmental liability

May address cleanup from sewage releases.

Inland marine

May cover pumps and boxes against theft.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
