

CONTAMINATED SOIL, METHODS AND SIGN-OFFS

Digging can spread pollutants.

You excavate or treat contaminated soil and may design or verify work. Declare field and professional roles; new pollution claims, disputed sign-offs and promised results need distinct terms.

RISKS WORTH DISCUSSING

- 01 Contaminants moved into clean areas
- 02 Disputes over design or closure work
- 03 Excavation damage to neighboring property

Coverage worth discussing

Environmental liability

Cleanup under accepted site/method release terms.

General liability

Claims under accepted nonpollution field duties.

Inland marine

Insured excavators, treatment gear and instruments.

Professional liability

Claims from accepted design/verification services.

Workers compensation

Benefits for qualifying remediation work injuries.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
