LARGE-SCALE SEED CRUSHING AND EXTRACTION

Extraction solvents can ignite.

You crush oilseeds and extract oil using heat and process equipment. Solvents, combustible dust and failed machinery create different fire, pollution and employee interests.

RISKS WORTH DISCUSSING

01 **Flammable solvent explosion hazards**

02 **Combustible dust ignition risks**

03 **Process equipment mechanical breakdown**

SOYBEAN AND OILSEED PROCESSING PLANT INSURANCE

Coverage worth discussing

Commercial property
Covers plant repairs after covered fire loss

Equipment breakdown
Covered internal failures of accepted extractors or boilers.

Environmental liability
Covered cleanup under accepted solvent-release terms.

Workers compensation
Work-injury benefits for eligible oilseed-processing employees.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 **Listen**
We review your operations, coverage and past claims.

02 **Assess**
We look at hazards and ways to reduce risk.

03 **Build**
We compare carriers, premiums and audit terms.

04 **Support**
We revisit coverage as your work changes.
