

ROW CROP AND HARVESTING OPERATIONS

Machinery breakdown and grain storage loss.

You plant and harvest soybeans around field conditions. A combine failure can delay harvest, while moisture can damage beans in storage.

RISKS WORTH DISCUSSING

- 01 Mechanical failure during harvest
- 02 Grain bin fire and explosion
- 03 Chemical drift and contamination

Coverage worth discussing

Inland marine

Declared combines or planters after covered physical damage.

General liability

Help with third-party injury claims.

Commercial property

Insured storage bins after covered physical loss.

Commercial auto

Covered road liability for declared soybean-hauling trucks.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
