

HIGH-VALUE FLIGHT HARDWARE MANUFACTURING

Test damage can threaten one-off flight hardware.

You build rockets or orbital systems. Review accepted ground and flight operations, propellant storage and one-off hardware.

RISKS WORTH DISCUSSING

- 01 Flight hardware defects and mission failure
- 02 Propellant and pressurized-system hazards
- 03 Loss of irreplaceable hardware

Coverage worth discussing

Products liability

Covered third-party harm from accepted space products.

Cyber liability

Response costs for covered design-data breaches.

Commercial property

Plant and cleanrooms after covered physical loss.

Umbrella liability

Extra limits above accepted underlying space risks.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
