

SPICE MILLING AND FLAVOR EXTRACTION

Dust can ignite during milling.

You grind, blend or extract botanicals for food ingredients. Dust, allergens and extraction solvents involve different product, plant and pollution terms matched to your actual process.

RISKS WORTH DISCUSSING

- 01 Pathogen and foreign material contamination
- 02 Undeclared allergen cross-contact
- 03 Combustible dust fire and explosion

Coverage worth discussing

Products liability

Covered resulting harm from accepted spice or extract products.

Equipment breakdown

Covered internal failures of accepted grinders or extraction units.

Commercial property

Insured botanicals and processing assets after covered damage.

Environmental liability

Covered cleanup under accepted solvent-release terms.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
