

METAL PROCESSING

A molten-steel breakout can damage the hot end.

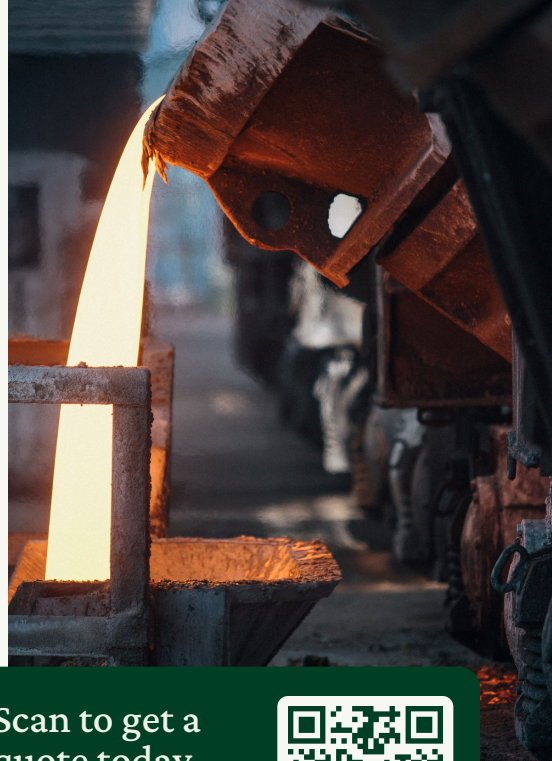

You melt and roll steel. Review breakouts, furnace or caster failures, overhead loads and emissions from the hot end.

RISKS WORTH DISCUSSING

- 01 Molten steel burns and breakouts
- 02 Furnace and caster breakdown
- 03 Overhead crane and dropped-load hazards

Coverage worth discussing

Commercial property

Covers physical damage to furnaces and steel stock.

Products liability

Addresses liability for injuries caused by steel.

Umbrella liability

Extra limits above covered underlying liabilities.

Equipment breakdown

Repair costs after an internal mechanical furnace failure.

Environmental liability

Fund cleanup expenses for covered pollution events.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
