

SURFACE WORKINGS, PLANT AND MINE WATER

Mine-water releases can spread harm.

You remove overburden, extract coal and move material through surface facilities. Actual mobile plant, water discharges and processing machinery need defined terms, with reclamation obligations considered separately.

RISKS WORTH DISCUSSING

- 01 Pollution from mine-water releases
- 02 Damage to mobile extraction equipment
- 03 Internal processing-machinery failures

Coverage worth discussing

Inland marine

Insured mobile plant under accepted surface-mine terms.

Commercial property

Insured surface facilities after covered physical damage.

Environmental liability

Covered cleanup under accepted mine-water release terms.

Equipment breakdown

Covered internal failures of accepted processing machinery.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
