

BOUNDARIES, SITE MEASUREMENTS AND FIELD GEAR

A boundary error can misplace a build.

You measure land and establish boundaries used for construction or property decisions. Accepted survey duties and prior-work dates matter alongside field instruments and actual crew vehicle use.

RISKS WORTH DISCUSSING

- 01 Allegedly incorrect boundary measurements
- 02 Theft of portable survey instruments
- 03 Road collisions during site travel

Coverage worth discussing

Professional liability

Covered claims under accepted surveying-service and date terms.

Commercial auto

Covered road liability for accepted survey vehicles.

Inland marine

Insured field instruments during accepted survey stages.

General liability

Covered nonprofessional injury from accepted site activities.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
