Coverage worth discussing

Products liability

Covered harm from supplied protective electrical devices.

General liability

Covered third-party harm during factory operations.

Equipment breakdown

Covered internal failures of test or assembly systems.

Commercial property

Insured plant, test equipment and electrical stock.

Workers compensation

Employee injury benefits for assembly or testing.

Umbrella liability

Extra limits above covered underlying liabilities.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
