RESIN POLYMERIZATION AND COMPOUNDING

Reactor runaway reaction fire hazards

You produce resins through polymerization. Reactor failures, fires or chemical releases can impact your operations.

RISKS WORTH DISCUSSING

01 Reactor fire or runaway reaction

02 Off-spec resin downstream failure

03 Monomer and feedstock storage hazards

SYNTHETIC RESIN/POLYMER PLANT INSURANCE

Coverage worth discussing

Products liability
Covered harm to others from supplied polymer products.

Environmental liability
Cleanup for covered monomer or process releases.

Workers compensation
Employee injury benefits for plant production duties.

Commercial property
Insured reactor plant, feedstocks and resin inventory.

Equipment breakdown
May help repair reactors after internal failure.

Umbrella liability
Extra limits above covered underlying liabilities.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 **Listen**
We review your operations, coverage and past claims.

02 **Assess**
We look at hazards and ways to reduce risk.

03 **Build**
We compare carriers, premiums and audit terms.

04 **Support**
We revisit coverage as your work changes.
