

BULK LIQUIDS, HOSES AND PRODUCT TRANSFERS

A failed hose can release a load.

You haul bulk liquids and connect pumps or hoses at delivery. Declare every commodity and transfer stage; cargo contamination, cleanout demands and third-party pollution cleanup need distinct terms.

RISKS WORTH DISCUSSING

- 01 Road crashes involving liquid surge
- 02 Releases during hose transfers
- 03 Contamination from incompatible loads

Coverage worth discussing

Commercial auto

Covered road liability for accepted tank operations.

Environmental liability

Cleanup under accepted transit/transfer pollution terms.

General liability

Covered non-auto site injury/property claims.

Motor truck cargo

Accepted bulk-liquid loss and contamination.

Workers compensation

Benefits for qualifying driving/hose-handling injuries.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
