

INDUSTRIAL TAR AND PITCH PROCESSING

Hot material can escape during processing.

You process feedstocks into tar or pitch for industrial users, where hot stills and stored materials create significant fire and spill hazards for your site.

RISKS WORTH DISCUSSING

- 01 Hot process material releases
- 02 Delayed worker illness allegations
- 03 Historic legacy site contamination

Coverage worth discussing

Environmental liability

Covered cleanup from accepted tar-fraction releases.

Products liability

Covered resulting harm from supplied tar or pitch.

Commercial property

Insured stills and declared stock after covered damage.

Workers compensation

Eligible employee injury or occupational-illness benefits.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
