

ROUTERS, HANDSETS AND ASSEMBLY SYSTEMS

A hot battery can injure a user.

You manufacture routers, handsets or other telecom devices. Accepted products, territories and stock locations matter; resulting injury, machine repair and recall or component-delay costs are different interests.

RISKS WORTH DISCUSSING

- 01 Resulting injuries from accepted device defects
- 02 Internal failures of assembly/test machines
- 03 Fire damage to component or device stock

Coverage worth discussing

Products liability

Resulting harm from expressly accepted device lines.

Equipment breakdown

Covered internal failures of accepted assembly equipment.

Cyber liability

Covered design/order-system response and privacy claims.

Commercial property

Insured components/devices at accepted locations.

Workers compensation

Work-injury benefits for eligible assembly/test employees.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
