

ANALYTICAL RESULTS AND CLIENT SAMPLES

A false result can mislead a client.

You issue analytical results that clients use to release products or make decisions. Accepted methods, entrusted samples and reagent releases need distinct terms, with lost sample value separate from instrument repair.

RISKS WORTH DISCUSSING

- 01 Allegedly inaccurate analytical reports
- 02 Damage to entrusted client samples
- 03 Internal analytical-instrument failures

Coverage worth discussing

Professional liability

Covered claims involving expressly accepted analytical methods.

Equipment breakdown

Covered internal failures of accepted analytical instruments.

Commercial property

Insured lab buildings and instruments after covered damage.

Environmental liability

Covered cleanup under accepted reagent-release terms.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
