

NURSERY PRODUCTION

An irrigation fault can threaten nursery stock.

You grow trees from liners to sale-ready stock. Living plants, irrigation repairs and handling injuries raise different production and liability questions.

RISKS WORTH DISCUSSING

- 01 Freeze and disease stock loss
- 02 Climate and irrigation system failure
- 03 Seasonal workforce lifting injuries

Coverage worth discussing

Commercial property

Insured greenhouses and declared fixed pump systems.

General liability

Covers customer injuries during property pickup.

Workers compensation

Provides benefits for propagation staff injuries.

Inland marine

Declared loaders or tractors after covered physical loss.

Equipment breakdown

Covered internal failures of pumps or heaters.

Commercial auto

Covered road liability for declared nursery-delivery trucks.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
