

UNDERGROUND CONSTRUCTION

A ground failure can trap crews and machines.

You use heavy boring machinery to excavate underground, where equipment failure or flooding can halt your production.

RISKS WORTH DISCUSSING

- 01 Ground collapse and tunnel face
- 02 Boring machine breakdown
- 03 Water inrush and dewatering

Coverage worth discussing

General liability

Helps pay covered injury or damage to surface utilities.

Inland marine

Protects boring machines and gear from site damage.

Workers compensation

Supports qualifying employees injured underground.

Builders risk

Helps repair tunnel works damaged during construction.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
