

UNDERGROUND WORK AND VENTILATION SYSTEMS

A failed fan can halt mine work.

You extract coal below ground using crews, hoists and ventilation. Underground employees and equipment need explicit acceptance, with black-lung obligations, subsidence and routine mine-water control considered separately.

RISKS WORTH DISCUSSING

- 01 **Worker injuries during underground operations**
- 02 **Internal fan or hoist failures**
- 03 **Physical damage to surface mine facilities**

Coverage worth discussing

Workers compensation

Work-injury benefits for expressly accepted underground employees.

Commercial property

Insured surface facilities after covered physical damage.

Equipment breakdown

Covered internal failures of accepted fans and hoists.

Environmental liability

Covered cleanup under accepted mine-water release terms.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
