

SUBMERGED OPERATIONS

The work takes place beneath the surface.

You perform submerged construction where decompression illness, breathing-gear failure, or sediment disturbance can occur.

RISKS WORTH DISCUSSING

- 01 Diver injury and decompression
- 02 Loss of marine equipment
- 03 Underwater welding and cutting

Coverage worth discussing

General liability

Helps with covered injury from underwater repair work.

Inland marine

Protects diving gear, ROVs, and welding equipment.

Workers compensation

Provides injury benefits for qualifying marine crews.

Umbrella liability

Higher limits above covered underlying liabilities.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
